

SECTION 01120

FEEES

PART 1 - GENERAL

1.01 DESCRIPTION

- A. This section stipulates fees charged by the Little Rock Wastewater for connection of any facility to the City Sewer.
- B. Connection of any facility shall be preceded by payment of all applicable fees.

1.02 DEFINITIONS

- A. Little Rock Wastewater - The sewer collection system, treatment facilities, operational equipment and staff of the Little Rock Wastewater under the jurisdiction of the Sanitary Sewer Committee of the City of Little Rock, Arkansas, hereinafter referred to as "LRW".
- B. City Sewer - A public sanitary sewer in which all owners of abutting properties have equal rights and is maintained and controlled by the Little Rock Wastewater. No sewer smaller than six (6) inches in diameter shall be considered a city sewer.
- C. Permit - Authorization issued to a plumber or contractor upon request allowing installation of a building sewer to connect to the Little Rock Wastewater system of city sewers. Permit issued by Little Rock Wastewater is valid for one year from the date of issue. If permit is not used within the one year period a new permit must be purchased at the Fee Schedule in effect at that time.

PART 2 - FEES

2.01 TAPS

All sewer main taps shall be performed by the Contractor. All taps made on Little Rock Wastewater Sewer Mains must be inspected by LRW personnel.

2.02 CONSOLIDATED FEE SCHEDULE

Attached as part of this section is the latest update of the Little Rock Wastewater Consolidated Fee Schedule.

2.03 CAPACITY CONTRIBUTION FEES

- A. Capacity Contribution Fees are calculated specifically for each project.
- B. The procedure for calculating the Capacity Contribution Fees are as follows:
 - 1. For the basin, the collection system's maximum flow capacity is determined.
 - 2. Given a location in the basin and the proposed area served, a design capacity (GPM/acre) is determined.
 - 3. The proposed development is evaluated on the basis of its flow contribution to the existing system.
 - 4. Capacity needed in excess of the design capacity is charged to the development based on the current cost to restore that capacity.
- C. Capacity Contribution Fees must be paid by the Developer prior to any construction taking place on a project.

2.04 REIMBURSEMENT FEES & CAPITAL RECOVERY FEES COLLECTED BY THE UTILITY

The Utility is required to collect pro-rata acreage fees for connection to specific projects that have entered into an Extension Reimbursement Agreement with LRW or for certain projects installed by Little Rock Wastewater. These charges will vary depending on the specific project and its location. This information is available from LRW upon request. All such charges will be paid by the Developer prior to construction. No construction may begin on any project unless all pro-rata acreage charges are paid by the Developer.

END OF SECTION 01120
